R326

May 14, 1964

The Honorable Ogden R. Reid
House of Representatives
Washington, D.C. 20515

Dear Congressman Reid:

I am completely disgusted with the fact that a pinko professor from New York University is able to command a fee of $100.00 a day as employed by the Earl Warren Committee, which is supposed to be investigating the assassination of President Kennedy.

In fact the findings are supposed to be so TOP SECRET that the American public will never know them so states the great Warren. But a man that has commie affiliations is allowed to compile same.

Some people do not seem to understand the fact that we are at war with Russia. Since that is the case such a man as the red professor should be removed from government employment. In fact during time of war Navy Regs has an item concerned with traitors.

My best to you and Miss Davis and the others in your office.

Sincerely yours

J. A. Julier
